## **Section 3: Hazards Identification**

**Emergency Overview:** 

Routes of Entry: Route Entry Risk

InhalationPossibleIngestionPossibleSkin ContactPossibleEye ContactPossible

Potential Health Effects: Inhalation May cause nausea and respiratory tract irritation. May cause respiratory sensitization

in susceptible individuals.

Ingestion No significant signs or symptoms of any adverse health hazards.Skin Contact Product is a slight skin irritant. May Cause swelling and redness.

**Eye Contact** Mild eye irritant. Vapors slightly uncomfortable. Splashes irritating and painful.

Acute Health Hazards: No information is available on the acute health hazards of this product. Based upon data from testing

of similar products, no significant effects are expected.

Chronic Health Hazards: If misted or at high concentrations, may cause pallor, nausea, anesthetic or narcotic effects.

Medical Conditions Generally Aggravated by Exposure:

Skin and eye sensitization. Depending on individual skin sensitivity, chronic or prolonged exposure

may result in irritation, blistering, burning and peeling of skin layers.

Carcinogenicity: OSHA: No data ACGIH: No data NTP: No data IARC: No data

Other:

#### **Section 4: First Aid Measures**

Eye Contact: Immediately flush with plenty of water for at least 15 minutes. If redness, itching, or a burning

sensation develops, seek medical attention.

Skin Contact: Remove from skin immediately. Rinse with clean water for 20-30 minutes. Use soapy water if

needed. If redness, itching, or a burning sensation develops, seek medical attention.

lngestion: Do NOT induce vomiting! Dilute with water and seek medical attention immediately.

Inhalation: Move victim to fresh air immediately. Give oxygen and seek medical attention.

Special Fire Fighting

Procedures:

Remove all ignition sources. Wear self-contained breathing apparatus and complete personal protective equipment when entering confined areas where potential for exposure to vapors or

products exist.

Unusual Fire and Explosion Hazards:

Closed containers may rupture due to build-up of pressure when exposed to extreme heat.

Hazardous Decomposition

Products:

#### **Section 6: Accidental Release Measures**

Accidental Release Measures:

Avoid contact with material. Persons not wearing appropriate protective equipment should be excluded until spill is cleaned up. Stop spill at source, pump liquid to salvage container. Remaining liquid may be taken up on clay, diatomaceous earth, or other absorbent. Treat with Decontamination Solutions: Nonionic surfactant Union Carbide's Tergitol TMN-10 (20%) and water (80%); concentrated ammonia (3-8%), detergent (2%) and water (90-95%).

#### **Section 7: Handling and Storage**

Handling & Storage

Precautions:

Prevent all skin and eye contact. Avoid breathing vapors. Re-seal partially used containers. Wash with soap and water before eating or drinking. Protect from moisture contamination. Exothermic generation of carbon dioxide may cause dangerous pressure. Keep away from all ignitable sources as well as extreme heat. Do not expose to excessive moisture.

#### **Section 8: Exposure Control/Personal Protection**

Ventilation: Adequate ventilation required. Local exhaust may be required in some areas. Special exhausting

generally not required. Mechanical exhaust usually adequate.

Respiratory Protection: Respiratory masks should be worn at all times when adequate ventilation does not exist. A

NIOSH/MSHA respirator is acceptable.

Eye Protection: Chemical tight goggles; full face shield if splashing is possible.

Skin Protection: Coveralls and impervious foot covering is recommended.

Other Protective Clothing

or Equipment:

Use impervious gloves, neoprene or rubber.

Work/Hygenic Practices: Good air flow in working area. Eyewash station and safety shower should be available. Gloves and

respiratory equipment should be worn at all times.
